Price and money path

$N = P - F - T - D$ For one \$9.99 card: $\$9.99 - \0.59 card fee – T (sales tax, passed through) – \$0.00 delivery = $\$9.40 - T$. Then $N = B + C + A + O + R$, written down before the first sale.

Price \$9.99 is AUTHORIZED on the existing Shopify record “THYLORA Celebration Card Studio” (tag PRICE-AUTHORIZED); the record stays DRAFT and NOT-OPEN-FOR-ORDERS because the submit → proof → approve → deliver path does not exist yet. No photos or likenesses are accepted in this version.
